

IdeaGen Portfolio Summary

What it is:

- Multi-model idea generator with ranking, compare, and decision reports.
- Focused on reliable, decision-ready outputs for stakeholders.

LLM engineering highlights:

- Provider routing across OpenAI, Gemini, DeepSeek, and Grok.
- Agentic JSON validation with retries and fallbacks.
- Model ranking rubric: clarity, feasibility, differentiation, actionability, risk awareness, stakeholder readiness.
- Compare Results uses top-ranked outputs for decision diffs.

System components:

- Next.js UI for configuration and report review.
- FastAPI backend for orchestration and report generation.
- SQLite persistence for runs, comparisons, and summaries.
- PDF and email exports via WeasyPrint + Resend.

Deliverables:

- Generated results, model ranking, compare reports, decision summaries.
